

REACH compliance declaration

Dear valued customer,

The European Regulation 1907/2006 on Registration, Evaluation, Authorization, and restriction of Chemicals (REACH) entered into force on June 1, 2007 and was updated as of November 5, 2025. The goal of REACH is to ensure the protection of human health and the environment from the risks that can be posed by chemicals.

This legislation will have significant impact on all manufacturers, importers and downstream users in the EU and requires registrations of chemical substances, preparations, and articles with an intended release of substances. Suppliers operating outside the EU are asked to support this initiative by providing certain data regarding the hazards of the substances to ensure compliance.

Registration

CleanMark does not manufacture chemicals, preparations or articles that intentionally release substances under normal operating conditions and therefore does not fit within the scope of entities obligated to pre-register and register with REACH. Both our company and key suppliers are committed to fulfill our legal obligations under REACH and seek to uphold our role in the necessary communication network needed to support REACH compliance.

Restriction of Chemicals – Annex XVII

Annex XVII of the REACH regulations imposes restrictions on hazardous substances in preparations or articles that present risks to human health or the environment. The restriction covers a wide range of applications. We certify that

our products comply with the conditions of the restriction as defined in Annex EVII Titled "Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles" dated June 26, 2009.

Substance of Very High Concern (SVHC) – Annex XIV

As of November 5, 2025, ECHA (The European Chemicals Agency) has placed 251 substances in the Candidate List of Substances of Very High Concern for authorization. Any SVHC must not be used, manufactured, or imported without the prior authorization of the ECHA. The "candidate list" will be updated and published periodically by ECHA as more substances are identified as SVHC.

All CleanMark articles are not intentionally manufactured or formulated with compounds and substances above the 0.1% threshold by weight listed in the Reach document titled "Candidate List of Substances of Very High Concern for Authorization" dated November 5, 2025.

The determination is based on information from sources which we believe are reliable. Product users are responsible for determining the applicability of REACH and other related environmental regulations based on their individual usage of the final product.
